Hi Jean,

1) Do you have the specific reports ADEQ is requesting to proceed? Please respond to both EPA and ADEQ (Dianna Kilburn), thanks.

2) ADEQ's groundwater comments are have not been received yet... but meanwhile, I did want to share EPA ORD's findings with you. While EPA has not made any final decisions yet on the Arkwood groundwater pilot, I would like to consider any input from McKesson on these comments, especially the ones dealing with employing in-situ chemical oxidation.

Subject: Arkwood information

Dear Mr. Tzhone:

Attached are documents related to the Arkwood, Omaha, Arkansas site closure. I have located the work plan on what would be done and proposed remedial goals for soils on the site and in the railroad ditch. What I am not able to locate are the final closure reports with the final sample dioxin concentrations in the rail road ditch and on site and the surveyed location of the cap on the site. The contractor for the PRP should be able to supply this information. This information is necessary to finalizing the necessary deed restrictions. If you have questions or if you have difficulty with the attachments, please call or e-mail me.

Sincerely,
Dianna Kilburn
